Introduction

I wanted to start with a Quotation

“Complexity of BI is now simple with Tableau”

We are committed to help you deliver value to your business through our solutions and services. Our Consultants have extremely high knowledge and background on Tableau and are always motivated to leverage their knowledge base to assist your businesses by implementing solutions using Tableau.

- We offer top-of-the-line Data Warehousing & Data Visualization prowess in managing big data & building solid business models by creating tailored Tableau capabilities for clients.
- We believe Data Analysis and Data Visualization are part of everyday business judgments and decisions.

Our Tableau Public Profile:

<https://public.tableau.com/profile/sphyzee#!/>

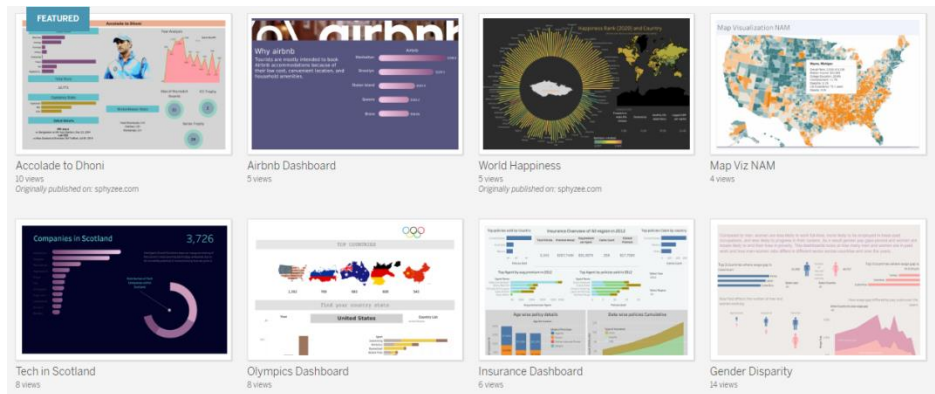

Tableau Proof of Concept & Project Planning

We are ready to accept challenging work and always open to do a quick POC and showcase how Tableau fit in to your business. Our expertise helps from Data Preparation (ETL) to Dashboard delivery and Server Implementation. With multi-industry and years of practical experience we will deliver results that would delight you.

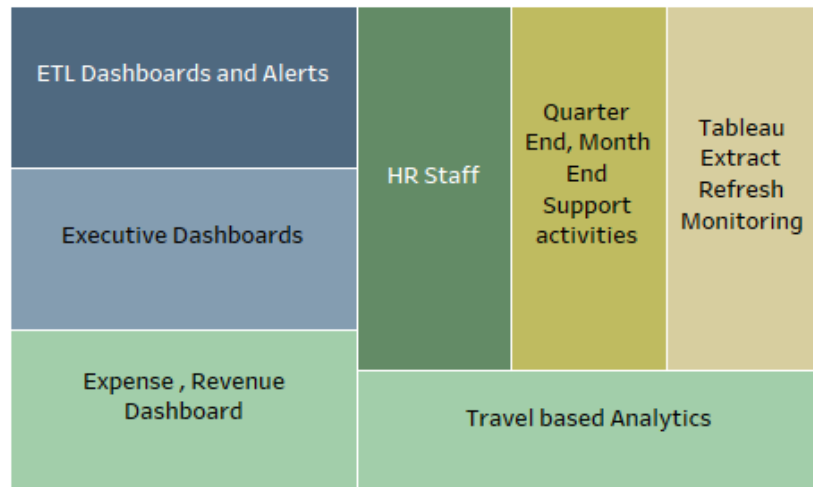

Tableau Server Consulting

Your awesome data visualizations need a place to live, and Tableau Server is the perfect home. With Tableau Server, you can easily access and share dashboards across your organization. Complete security and governance keep your data safe. We have Tableau Server experts can help build the ideal server environment that would scale and run robust.

Our Domain Experience:

Our Ideas:

We as a team have lots of ideas to integrate Data Science into Tableau for quicker decision making, Leverage out of the box API's to make most of the following automated.

Automate the weekly / monthly deployment activities

Tableau Java Script API and HTML for Embedded Analytics

Metadata API (GraphQL) based automation for Tableau Catalog like solution

Server Monitoring Automation
